

# IDA 2011

**29-31 October 2011, Porto, Portugal**

When the biennial IDA Symposium series started in 1995, it focused on the problem of end-to-end intelligent support for data analysis. IDA 2011 will refocus on an important and still emerging class of problems: modeling and analyzing complex dynamical systems such as economic systems, gene regulatory networks, social networks, systems of natural resources, and cognitive systems. The Symposium seeks "first look" papers that might elsewhere be considered preliminary but contain potentially high impact research. The IDA Symposium is open to all kinds of modeling and analysis methods, irrespective of discipline. It is expected to be an interdisciplinary meeting that seeks abstractions that cut across domains. IDA2011 welcomes papers that focus on dynamic and evolving data, models, and structures.

In line with the new theme of IDA 2011, the IDA Frontier Prize will be awarded to the most visionary contribution. Submissions considered for this award must present novel and surprising approaches to data analysis in the understanding of complex systems. The award consists of a plaque and a prize of 1000 Euros.

Conference Chair:

*João Gama, University of Porto, Portugal*

Program Chairs:

*Elizabeth Bradley, University of Colorado, USA*

*Jaakko Hollmén, Aalto University, Finland*

Publicity Chair:

*David Weston, Imperial College, London, UK*

Frontier Prize Chairs:

*Michael Berthold, University of Konstanz, Germany*

*Niall M. Adams, Imperial College London, UK*

**Important Dates**

May 14	Submission deadline
July 13	Author notification
Aug 13	Camera ready-copy

Tenth International Symposium on Intelligent Data Analysis
